

color of nature

Paper
for
Life.

Introduction

Nature is filled with color and the chameleon is known for using it to express their emotions. We invite you to express yourself in these pages.

The *Color of Nature* is Hammermill's celebration of its new packaging. Our paper is scientifically designed and rigorously tested to perform at the highest level... every time. For over 100 years, Hammermill® Paper has been dedicated to helping you capture ideas, share your thoughts, and show your work at its best. This coloring book celebrates the animals in the Hammermill Habitat, who are featured on the new Hammermill paper packaging design. The chameleon uses color to express his emotions, and we invite you to express your creativity as you color these pages. Share your pictures on social media with #PaperForLife.®

Butterflies

have taste receptors on their feet to
help them locate food and find plants
that are receptive to their eggs.

Parrots

Are known to live between
35 and 50 years.

Rabbits

can see almost 360 degrees. If you want to sneak up on one do it from the front—they can see what's going on behind them but have a blind spot in the front.

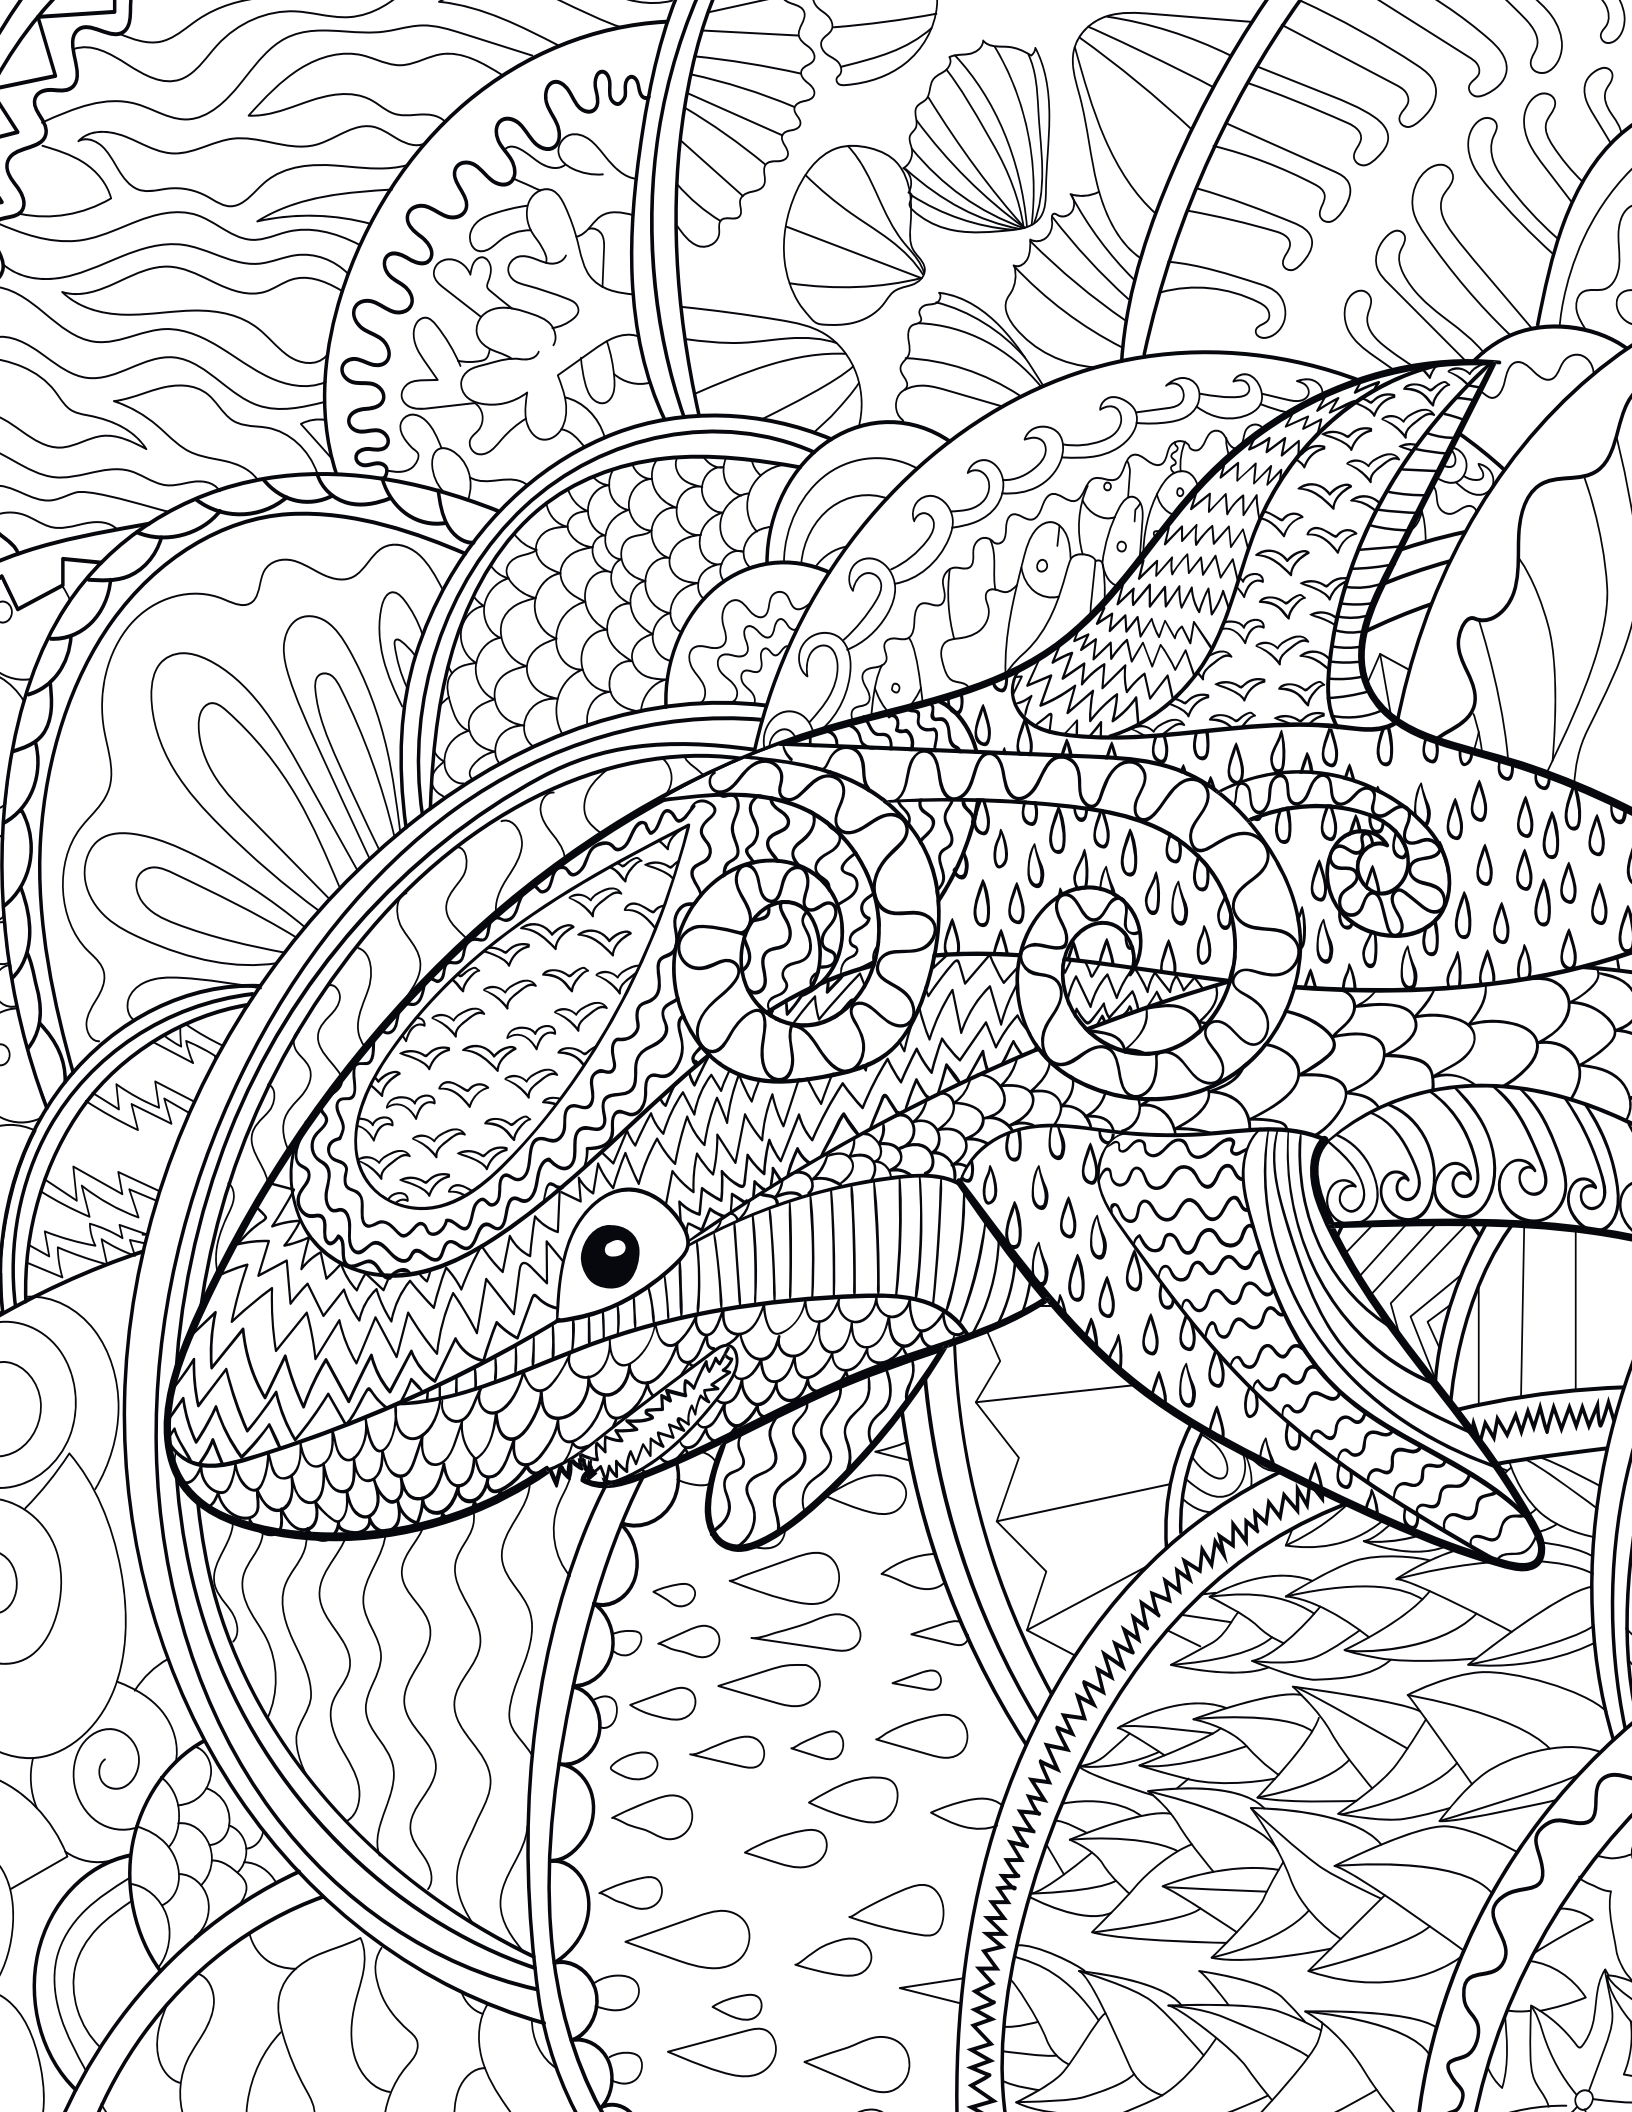

Sharks

must keep moving to keep water moving over their gills to give them oxygen. They are living connections to dinosaurs—they have evolved very little over the millennia.

Hammermill® Papers

Meet the Hammermill® Habitat
